

Our mission at OKTAV is to nourish musical passion on the piano by enabling fun and progress through our subscription-based platform. We can't wait to have you join our team!

To fuel our growth we're looking for a

## C#/.NET Developer (m/w/d)

### About the role:

We are looking for a highly motivated software developer to join our exciting journey to fuel our growth with further development and bringing innovative ideas to life.

### Our tech stack:

The main products are developed with C# (ASP.Net Core) and Vue.js (TypeScript) and hosted in Kubernetes on AWS. PostgreSQL is our database choice for the core applications. Depending on the use case we also involve NoSql databases, cloud services and other programming languages, such as Python and scripting languages.

### What we offer:

Although you will start by developing features with the product development teams, there will be plenty of opportunities to deep dive into other topics along the way. We can assure you that with your willingness to learn and proactive way of thinking you will work in the field of your passion and with technology that you love.

### Further highlights:

- Developing with the latest technology
- Working in a fast paced and innovative environment
- Excellent work-life balance and fair salary
- Transparency and fairness
- Startup atmosphere and mindset

### What we expect:

Either you provide the following or you have the right attitude to acquire the skill set fast:

- The techstack is appealing to you
- You know how to write code that is considered good quality
- Although you will receive a lot of help and guidance, you should be eager to learn and comfortable with digging into topics yourself
- You are a team player and open for constructive criticism
